Transfer Connections
Mission Statement

Transfer Connections seeks to improve the transition of new transfer students by connecting them with mentors and creating workshops and activities relevant to their success at UM. Additionally, Transfer Connections provide new transfer students with access to a network of faculty and staff who are knowledgeable about navigating the University of Michigan.

Program Goals:

- Provide individual guidance and support to each transfer student participant over the course of his or her transition process.
- Facilitate easy access to information regarding class enrollment, locations of campus facilities, use of computer network systems and other essential information through newsletters and regular communication from the Transfer Connections staff.
- Present opportunities to socialize and interact with other University of Michigan students and nurture academic and co-curricular interests through informational sessions and workshops.
- Address the needs of transfer students by accommodating their often busy schedules, particularly those that commute and/or have multiple commitments.
- Communicate with a faculty and staff network to supplement the mentoring relationships.
